

BATTERY FORKLIFTS

2.0 to 3.5 ton capacity 4wheel B20NS / B25NS / B30NS / B35NS

OUR MISSION

We empower operators to accomplish more, while working in the toughest conditions and tightest situations. When our customers have the will, we provide the way.

INTRODUCTION

BOBCAT'S HISTORY

In 1958, Melroe Manufacturing Company introduced a compact front-end loader that evolved quickly into the M400, the world's first true skid steer loader. The company soon adopted what became the world-famous 'Bobcat' brand – and its success paved the way for the global compact equipment industry we know today.

YEARS OF EXPERIENCE

In 2021, Bobcat expanded its portfolio by acquiring Bobcat Industrial Vehicle. This specialist in material handling equipment constructed its first forklift in 1968 and went on to establish a global presence with 400 dealers in 93 countries.

BOBCAT TODAY

Bobcat is expanding its portfolio with the addition of forklifts and reach trucks for the material handling industry. Offering a comprehensive line-up that will meet all your intralogistics needs. Bobcat forklifts and reach trucks are produced in our factory in Korea and China, while our premium quality warehouse equipment is made in Germany.

EXPERIENCE THE FULLY ENHANCED VALUE OF NXE SERIES

FAR BEYOND THE EXPECTATION,

Bobcat's new BNS series electric forklifts are equipped with various ergonomic design and safety features based on the outstanding performance and durability. It delivers optimal productivity and operator convenience.

Dual battery connector.

HIGH PERFORMANCE WITH OUTSTANDING DURABILITY Performance is maximized by

Convenience features. (Storage box, USB power, Document clip, Cup holder)

> combining advanced design and the latest technology. Highly durable main components improve uptime and maintenance cost. P 6-7

EXCELLENT OPERATOR COMFORT

The various convenience features are equipped as standard, providing more comfortable working environment with less fatigue. P 8–9 • ENH Various unexpend and pro-

ENHANCED SAFETY Various safety features prevent unexpected safety accidents and protect operator.

Full color display. Hydraulic weight scale. High residual capacity. Highly qualified driving/ hydraulic motor with water & dust proof. (IP54 rated)

> Li-ion battery. Battery side extract system.

• MAXIMUM UPTIME The robust components ensure durability and reliability. All primary components are easily accessible, making maintenance simple and efficient.

P 13

HIGH PERFORMANCE WITH OUTSTANDING DURABILITY

ADVANCED DURABILITY FOR YOU AND YOUR OPERATION

The combination of highly-efficient Curtis AC controller, high-performance motor and drive axle maximizes the performance, delivering the highest productivity in various applications.

HIGH RESIDUAL CAPACITY

Various line-up from 2.0ton to 3.5ton.

By increasing the stability, it provides high residual capacity even at a height of 4m. The system voltage of 3.0t/3.5t model is 80V, allowing more powerful operation when handling heavy loads. B25NS: 2.1 ton capacity at 4.7m height.

B35NS: 3.0 t capacity at 4.7m height.

E-MOTOR FOOT BRAKE (EFB,STANDARD TRIM)

The EFB activates braking by controlling the motor electrically instead of the conventional hydraulic brake. It brings less pedal force and ankle fatigue of operator. The simple brake structure makes it less troublesome and reduces maintenance costs.

HYDRAULIC SHOE BRAKE

Generates great braking force Precise control operation possible Greater braking effort than EFB Brake fluid management required.

RELIABLE AC CONTROLLER

Curtis AC controller controls driving/ hydraulic operation, resulting in optimum power and performance. IP67 rated water & dust proof feature protects against water even it is sink in depth of 1m underwater.

TILT CYLINDER BOOTS (OPT)

Prevent inflow of water and corrosion of

the tilt cylinder rod.

RELIABLE PERFORMANCE BY COMBINING ROBUST SINGLE DRIVE AXLE AND LOW NOISE/DURABLE MOTOR

Powerful single drive axle transmits power and torque of motor efficiently. IP54 rated durable AC motor protects motor and its components against liquid from any direction even in the rain.

STABILITY OPTIMIZED

By applying the H-type axle, the overall layout is optimized and center of gravity is lowered. It enhances stability so that heavy cargo

It enhances stability so that heavy cargo can be handled stably.

COMFORT

EXCELLENT OPERATOR COMFORT

LARGE ENTRY GRIP BAR AND ANTI-SKID STEP PLATE

BERGONOMICALLY DESIGNED HYDRAULIC LEVERS WITH FORWARD AND BACKWARD SWITCH

The size of entry grip bar & step plate are enlarged. It helps safer get on/off. on the hydraulic lever, enables more

movement.

VARIOUS CONVENIENCE FEATURES MAST LOWERING CUSHION

5V USB power / Document clip Cup holder / Storage box

The hydraulic cushion minimizes the impact by reducing the lowering speed at the end. *2-Stage mast only.

B ERGONOMIC OPERATOR COMPARTMENT

Thanks to spacious leg room, operator works at comfortable posture during the long hours of working. Get on/off in a easy and safe way by lowering the height of step & floor plate

EXCELLENT FRONT VISIBILITY

A ()

Optimized layout of mast chains & structures provides excellent front visibility.

Front cowl height is lowered to reduce blind spots. The over head guard thickness and layout are optimized for wide visibility.

Compact steering wheel Compact steering wheel offers steering convenience and reduces operator fatigue.

Full color display The full color display has good visibility even in the outside and can grasp the various status of the forklift easily.

Forward and backward switch is located convenient switching direction with less

DUAL BATTERY CONNECTOR

Dual battery connector maximizes convenience of charging. Charger can be connected directly without disconnecting the battery connector.

LED LIGHT

Bright, long-lasting LED light equipped as standard provides brighter visibility.

SAFETY

ENHANCED SAFETY

GSS (GUARDIAN STABILITY SYSTEM, BASIC)

ISO3691 Hyd. locking valve Operator sensing system Low battery warning alarm

B GSS PLUS (GUARDIAN STABILITY SYSTEM, OPTIONAL)

Decrease of travel speed (up to 50%) when the mast is raised above the primary stage. Forward tilt is restricted by 2 degrees when the mast is raised

above the primary stage. Alarm sounds when the mast is raised above the primary stage with the mast tilted more than 2 degrees.

ANTI ROLL BACK

The controller prevents the forklift from rolling back for 5 seconds when the truck is stopped on a slope.

FENCE LIGHT (OPTION) Warning is given to pedestrians by reflecting red lines around the vehicle.

ELECTRONIC PARKING BRAKE (EPB) The parking brake is activated automatically after 3 seconds of stopping to prevent accidents. The electronic parking brake (EPB) prevents the forklift from rolling back if the truck is stopped on a slope.

OSS(OPERATOR SENSING SYSTEM) seated.

SEATBELT INTERLOCK If the seat belt is not fastened, driving and mast operation are restricted to

prevent safety accidents.

▶ AUTOMATIC SPEED CONTROL

It automatically reduces the travel speed when cornering, reducing the risk of accidents or damage.

▶ ISO3691 HYD. LOCKING VALVE

If operator leaves or turns-off the truck, this system will automatically lock the hydraulic function, not allowing lifting, tilting, lowering.

OSS function avoids any unintended truck movements when the operator is not

Warning when operator leaves the seat without parking brake. Warning when operator drives without seatbelt fastened. Automatically stop the vehicle when operator leaves the seat.

BUILT TO LAST

EXCELLENT RELIABILITY

Bobcat 7-series PLUS electric forklifts are built tough to provide maximum uptime and dependability thanks to a reliable AC controller, dust & water-resistant parts, and an additional drive motor cover.

BATTERY SIDE EXTRACT (OPTION) FINGERTIP CONTROL (OPTION)

Side lift in-out: The battery can be replaced by using another forklift from the side.

Side Roll in-out: Rollers are installed on the frame, so battery can be replaced easily with less force.

The ergonomically designed fingertip controller enables precise and delicate control in a comfortable position, reducing fatigue and improving productivity.

The weight of the cargo can be easily measured by hydraulic type weight scale sensor.

The measured weight is displayed on the additional display.

MONO PEDAL (OPTION)

Forward and backward switch function is integrated into the accelerator pedal for quicker and easier forward and backward operation.

LI-ION BATTERY (OPTION)

Li-ion is the most advanced technology of battery. It has fast charging speed and nearly 4 times longer life cycle than lead-acid battery. It can be recharged quickly during the break time, truck can be operated for a long time, so there is no need to replace the spare battery. No harmful gas is emitted during charging and discharging. It makes cleaner and healthier work place.

No need to add distilled water or electrolytes. It reduces maintenance cost in the long term.

We provide 5-year or 2,500-cycle warranty.

Easyview To examine the forklift and set

the program with notebook only (without a special tool)

AUTO TILT LEVELING (OPTION)

With the auto tilt function, mast can be moved in a vertical position easily during the forward tilting.

COLD STORAGE (OPTION)

THERE'S NO TIME FOR DOWNTIME. **STAND UP TO EVERY TASK THAT COMES YOUR WAY.** DAY AFTER DAY.

Junction Box

Fuse, CAN port are placed in a spot for quicker access and maintenance.

Hood Locking Cylinder It helps easy maintenance and prevents safety accident.
